Project Introduction

DNFT is a cross-chain decentralized NFT asset network based on Substrate, dedicated to building a new generation of NFT protocol, especially for big data and practical NFT assets. We integrate NFT asset creation, NFT asset decentralized swap/auction, NFT asset maintenance tax, NFT recovery mechanism, and DNFT governance (DNFT DAO).

DNFT Protocol maintains the DNFT DAO mechanism through on-chain governance, oracles, storage mechanism management, recycling mechanism management, and system protocol management development.

Product Description(1)

DNFT Protocol is developing a substrate-based blockchain network, which will help improve data authentication, circulation and privacy protection.

DNFT includes five key components: DataNFT, DataStorageWithTax, DataSwap, DAO Governance and AI-Kit. The whole system provides the generation, storage, exchange, sharing, dissemination of data. Through the data ETL and data label annotations, we're creating a data framework between personal data and AI models.

DNFT Protocol integrates the functions of NFT asset creation, NFT asset decentralized transaction/auction, NFT asset maintenance tax, NFT recovery mechanism, and DNFT governance. At the same time, NFT and assets are transferred across the chain by integrating Polkadot cross-chain asset protocol(XCMP).

Product Description(2)

The algorithm stable token module of DNFT Protocol obtains dUSD (DNFT Protocol ecological stable token) by pledging dot (Polkadot ecological token). dUSD and DNF(DNFT Protocol ecological token) will be used as entrance tokens for NFT, games and other applications of DNFT Protocol ecology.

The algorithmic governance module of DNFT Protocol governs the ecology of DNFT Protocol through the proposal voting method of DNFT Protocol Council members. DNFT Protocol encourages NFT and game projects to join DNFT Protocol ecosystem.

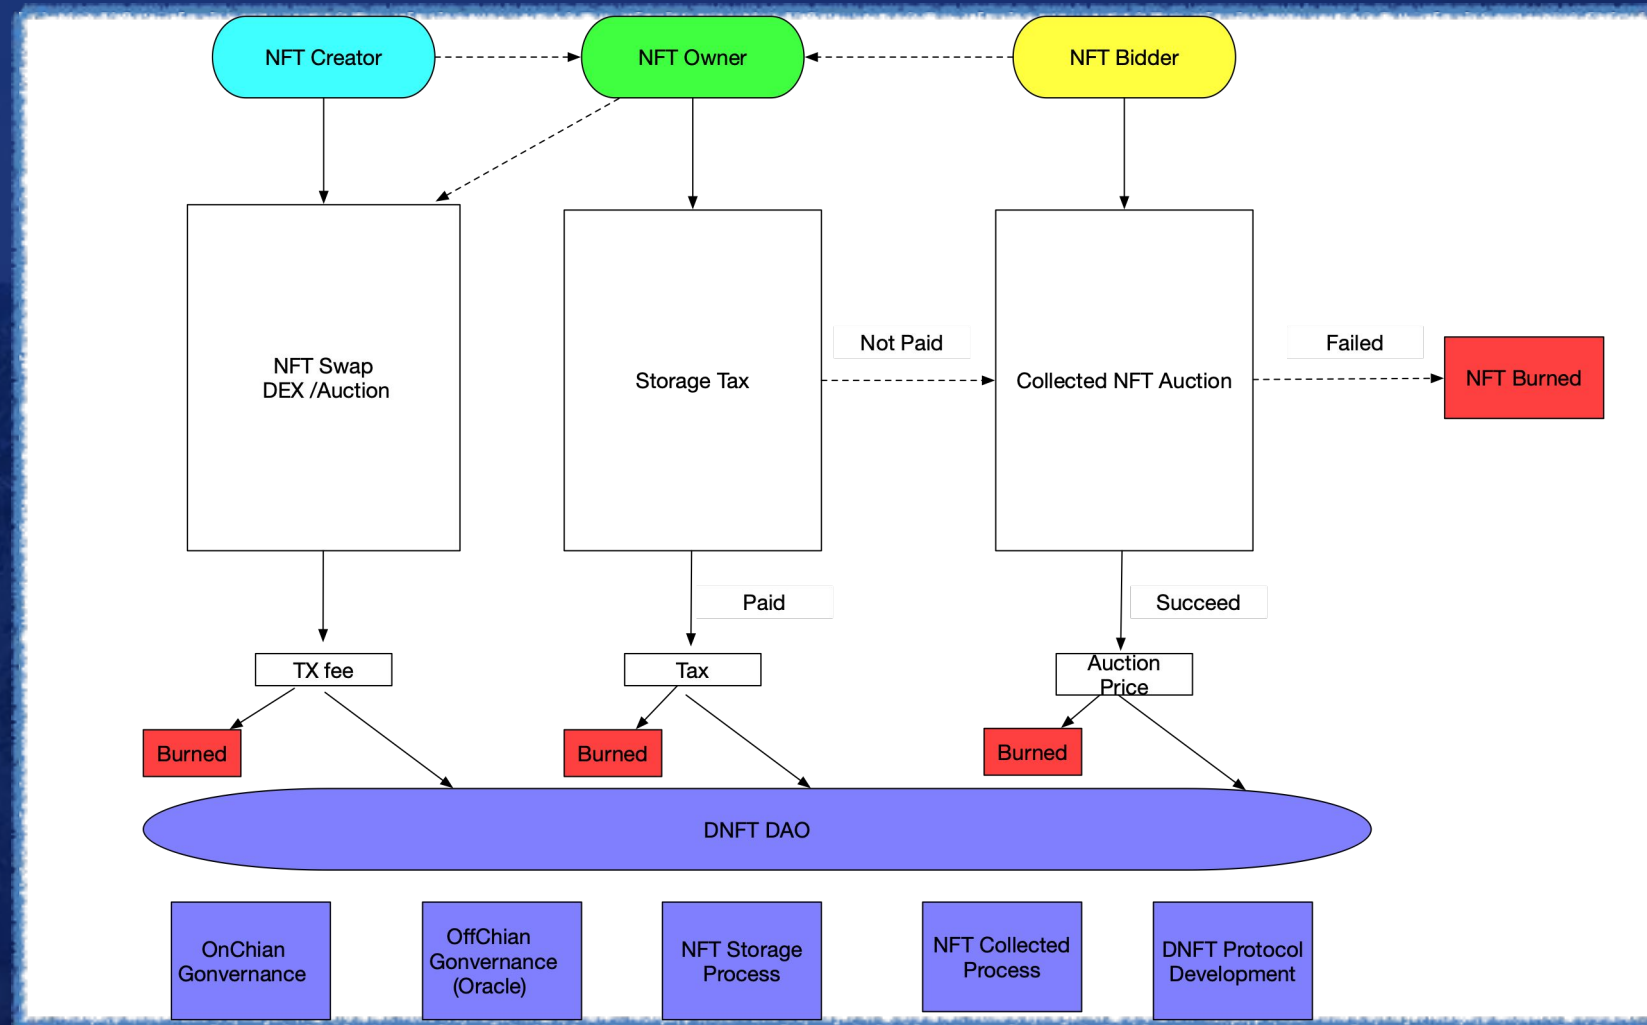

When the main network is officially launched, an incentive plan for NFT and game projects will be granted online to fundraise, develop and enrich DNFT Protocol ecosystem.

DNFT Project Help Industry

Borrow

Borrow dUSD with your spare token assets

Build

Build your first NFT with DNFT Protocol

Trade

Trade your token & NFT assets on decentralized exchange

Game

enjoy your game time with DNFT Protocol

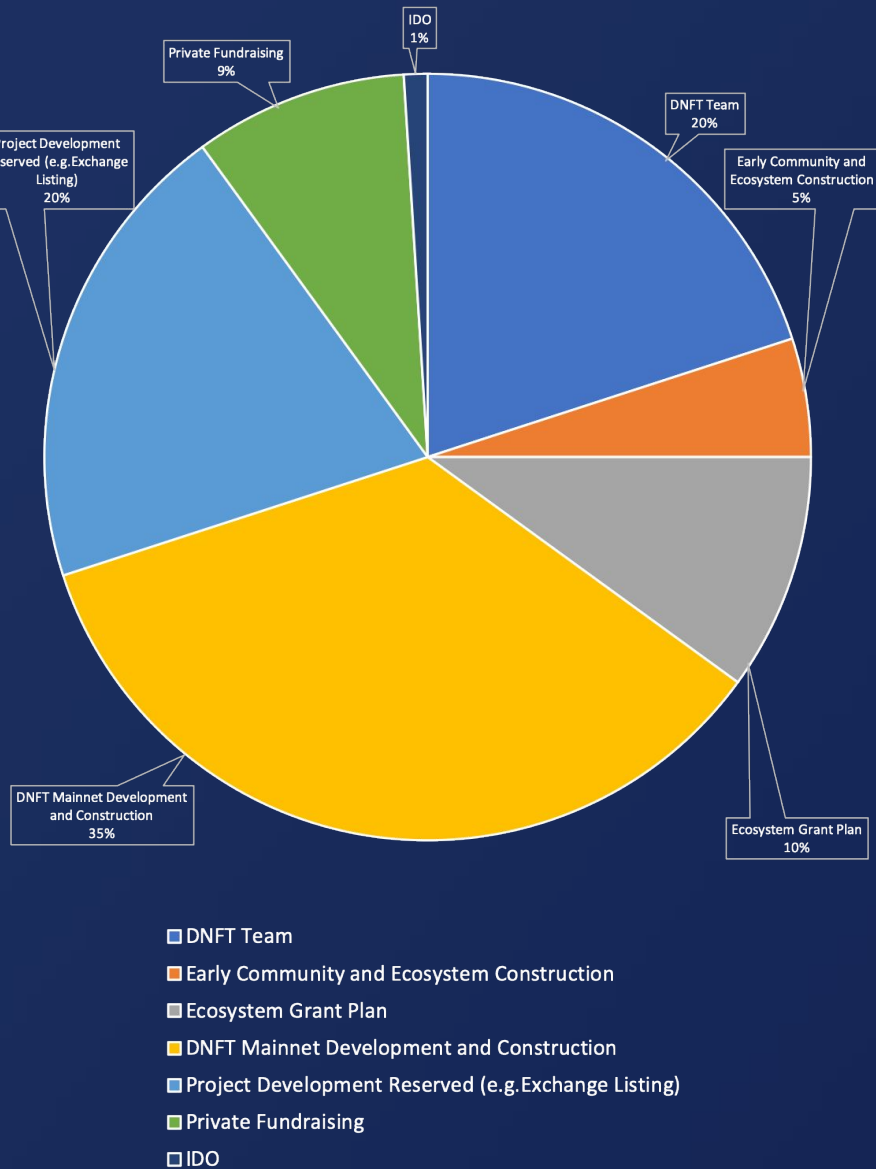

Honors & Awards

- 2021 **Web3.0 Foundation Grant (Wave 9)**
- 2021 Dorahacks X BSC Hackathon, **BSC Grant Award**
- 2020 Dorahacks Hangzhou Hackathon, **2nd Place Winner**
- 2020 Wanxiang Hackathon, **Sponsorship Winner**
- 2020 Wanxiang Hackathon
 - **Filecoin Sponsored Award**
 - **Acala Sponsored Award**

DNFT Tokenomics

Tokenomics

Total supply : 100,000,000

1) 20% will be reserved for the DNFT Protocol team, and the team share will be locked in advance, and 10% will be released every quarter after the main network of DNFT launch, totally 10 quarters will be released.

2) 5% will be reserved for early community ecosystem construction (including testing network tasks, community construction activities, etc.).

3) 10% will be reserved for the ecosystem grant plan. After the main DNFT network launch, the NFT and game ecological construction incentive grant plan will be opened simultaneously to encourage the projects joining the DNFT Protocol ecology. The incentive proposal will be voted by the DNFT Protocol Council.

4) 35% will be reserved for DNFT main network development and construction (including: allocated to slot auction voting participants, early LP and block packaging collectors, etc.).

5) 20% will be allocated to Project Development Reserved (e.g. Exchange Listing)

6) 9% will be allocated to Private Fundraising

7) 1% will be allocated to IDO

DNFT Team

DNFT Protocol public team members, the members of its parent company DNFT FOUNDATION PTY LTD include

Steven Wu

Founder

Steven is the Founder of DNFT World. He is an expert in Cryptocurrency Market and has profound knowledge of Blockchain, DeFi and NFT. He has years of experience in the position of Senior Executive Officer. Steven holds an MBA from the University of Melbourne.

[in](#)

Jason Liu

CEO

Jason is the CEO of DNFT World. He is an expert in Cryptocurrency Market and years of experience in Software Development. Jason holds a master degree from Monash University.

[in](#)

Serge Ajamian

Strategic Advisor

Serge is the Strategic Advisor of DNFT World. He invests himself in Decentralized Future. Serge is a successful blockchain entrepreneur, investor, and experienced business leader. He has past working experience such as VP of Talent Spot Asia, Chief Growth Officer of Anytime Fitness. Serge holds a degree from

[in](#)

Adam Shuai

CTO

Adam is the CTO of DNFT World. He is a Product Manager and a Full-Stack Developer. His past experience has spanned key roles within pre-IPO start-up (TouchPal) through to global companies such as Honeywell. Adam holds a master degree from the University of New South Wales.

[in](#)

JU CHUN (JC) KO

Principal Scientist

JC is the Principal Scientist of DNFT World. He is the Assistant Professor and holds a Ph.D. in Computer Science. He works in Image Processing and Computer Vision Lab in National Taiwan University. He is the Serial Entrepreneur, founded Linkwish Inc (TW), Memora Inc (US), co-founded SELFToken Co., (HK&TW). JC was the first Taiwanese participant of Singularity University

[in](#)

N. Burak EKŞİ

Chief Auditor

N. Burak is the Chief Auditor of DNFT World. He contributed to the structuring of all processes of the company in accordance with the ISO / IEC 27001 Information Security standard and obtaining the ISO / IEC 27001 certificate. He ensured the continuity of the processes in accordance with the standards and he worked in the Information Security

DNFT Team

DNFT Protocol public team members, the members of its parent company DNFT FOUNDATION PTY LTD include

Vilma Mattila

Strategic Advisor

Vilma is the Strategic Advisor of DNFT World. She is specialized in providing funding for DeFi, NFT Protocols. She is a Problem-Solver, Polymath, Autodidact, Polyglot. Vilma was the Director of Growth at World Education Blockchain Association, Consulting Information Technology Specialist at United Nations Association of

[in](#)

Taylor Kylie

Marketing Specialist

Taylor is the Marketing Specialist at DNFT World. She is an experienced, passionate and dynamic marketing executive who leads from the front and makes an impact. She holds a degree from the University of Melbourne.

[in](#)

Eda Zha

Risk and Assurance Advisory

Eda is the Risk and Assurance Advisory of DNFT World. She is experienced in connection and influence across Group, APEA region and Countries stakeholders. She has extensive experience in identifying complex operational and system technology control weaknesses, raising assurance challenges to risk owners, and providing effective solutions. She has more than

Grants & Venture Capital

The logo for DNFT is a large, stylized blue 'DNFT' monogram. The 'D' and 'N' are connected, and the 'F' is a thick, blocky letter. The letters are set against a light blue circular background that has a subtle, textured pattern resembling a mountain range or a topographical map.

**Web3.0 Foundation Grants ,
BSC Grants, Filecoin Grants, ACA Grants,
LD Capital, Candaq Fintech Group, Waterdrip Capital, Mantra Dao,
Win Capital, 7 Star Capital, Amplio Capital, DoraHacks, 7 O’Clock
Capital, 1PAR, InnCube Crypto Capital, GD, CatcherVC,
Lanhu, ChainUp Capital**

As of 2021, Q1 DNFT has raised more than 2 Million USD
